Summary

.Hey there! I'm an aspiring Computer Engineering student with a strong passion for technology and its real-world applications. I thrive on solving problems and always have an eye out for innovative opportunities.

I've already learned C++, and currently, I'm diving into JavaScript. My big aim is to master the MERN stack (MongoDB, Express.js, React, and Node.js). I also have a solid foundation in HTML and CSS.

I'm all about continuous learning and hands-on experience. I'm actively seeking opportunities to collaborate with fellow tech enthusiasts and professionals who share my excitement for innovation. Let's connect and work together to shape the future!
